

# CNC Machinist Apprentice

Ketchie Inc. is an ISO certified facility, operating CNC equipment. Our capabilities include precision turning, milling, broaching, gear cutting and grinding. We serve a broad range of industries including railroad, textile, heavy machinery, agriculture, and industrial equipment. Ketchie is headquartered in Concord, NC and we serve customers nationwide.

Manufacturers in America have a hard time finding suppliers who will deliver competitively priced, high quality machined parts on time. Ketchie Inc. makes it easy from start to finish by investing in machining technology, people, and process. So that American manufacturers can do what they do best and have confidence in their supply chain.

## **Key Job Functions and Responsibilities:**

- Participate in related instruction at local community college in technical subjects related to CNC Machining and will be paid for hours spent attending associated instruction classes.
- Complete 2,000 hours of on the job learning and 1,200 hours of related instruction at local community college.
- Learn setup and operation of manual and CNC machines. Apprentice will inspect parts and perform benchwork on machined part solutions that meet customer requirements.
- Receive training and coaching on basic, intermediate, and advanced turning and milling machining processes.
- Receive training on troubleshooting equipment and quality compliance problems.
- Upholds Ketchie's Core Values and in all work-related activities.

## **Capabilities and Success Factors:**

- Steadfast focus on customer in all areas of responsibilities.
- Exhibits grit and determination to improve themselves professionally.
- Flexibility to adapt to deadlines, changing schedules, priorities, and unpredictable events within a fast-paced manufacturing environment.
